

80/20 TRENDS AUDIT

Our new complimentary service, helping to identify waste improvement, innovations & cost saving trends

Sharpsmart will work in partnership with your facility to conduct a streamlined '80/20' trends audit, which focuses on the 20% of departments that produce around 80% of your total waste. Our comprehensive audit focuses on all aspects of waste management to identify any trends and non-conformances impacting the five crucial areas of healthcare waste management.

THE BENEFITS

EXPERTISE

of highly trained waste management auditors

ALL WASTE STREAMS

& waste management practices

TRENDS

Highlights common trends & challenges

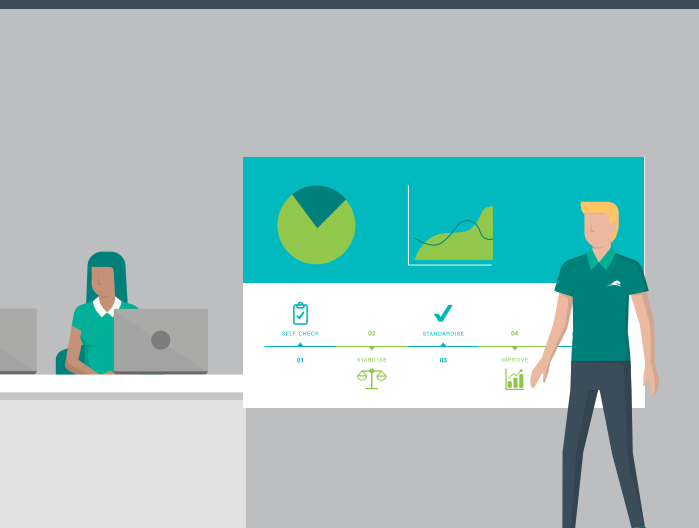

SOLUTIONS

innovations & actions to aid improvement

TAILORED

to focus on highest waste producing areas

You can also rest easy knowing that Sharpsmart's 80/20 trends audit is independent of any waste management or waste disposal contracts that your facility currently have.

The goal is to identify potential opportunities to keep you compliant whilst reducing costs and improving sustainability. At the end of the audit you will be supplied with a summary of our findings and provided with a list of observations, recommendations and follow-up actions.

After receiving your report, your Sharpsmart account manager will arrange a suitable time to go into a more in depth overview of each individual departments, reviewing specific results including photographic evidence and staff comments. During this time we will provide a report highlighting high impact costs, sustainability and compliance benefits which can be brought about by introducing low impact operational changes.

Aligning with the 5 needs of UK Healthcare

Sharpsmart's 80/20 Trends Audit is a complimentary service available to all healthcare facilities.

SHARPSMART.CO.UK

Our 80/20 Trends Audit & findings support the needs of your facility in the following 5 key areas:

Safety

Highlights areas where current practices may cause risk or injury to staff and patients.

Sustainability

Reviewing the current procedures & waste disposal methods and their alignment with your facilities own goals towards the climate change act.

Efficiency

Identification of improvement areas to support further efficiencies onsite through waste movements and portering, as well as cost reductions through waste segregations and other innovations.

Compliance

Ensures the waste segregation techniques carried out meet HTM 07-01 requirements and your facilities waste policy.

Education

The audit will review waste education methods and question staff on their knowledge. This will highlight areas for change and possible improvement.

DID YOU KNOW?

The 'Pareto' principle, also known as the '80/20 rule', states that for many events, roughly 80% of the affects come from 20% of the causes; this is what forms the basis of Sharpsmart's 80/20 trends audit.
