

SHARPSMART

Total Healthcare Waste Partner

Sharpsmart's total healthcare waste partnership approach is independent of your existing waste contract.

We understand the challenges your facility faces on a daily basis with regards to the management of healthcare waste, and as such it is our aim to support you in alignment with the 5-needs. If you're currently using other suppliers to deal with your waste, Sharpsmart can work with you to identify opportunities, challenges and solutions to achieve your goals in the critical areas of safety, sustainability, efficiency, compliance and education.

With over 30 years of experience in the healthcare industry, we have the expertise to guide you through the complexities of healthcare waste.

What we do for you.

- ▶ **Policy review and development of KPI's and strategy plan**
- ▶ **Provide marketing intelligence, industry market analysis and strategic business review**
- ▶ **Give independent advice, operational and service reviews of waste recycling, recovery and disposal solutions**
- ▶ **Drive segregation efficiencies and make your facility compliant**

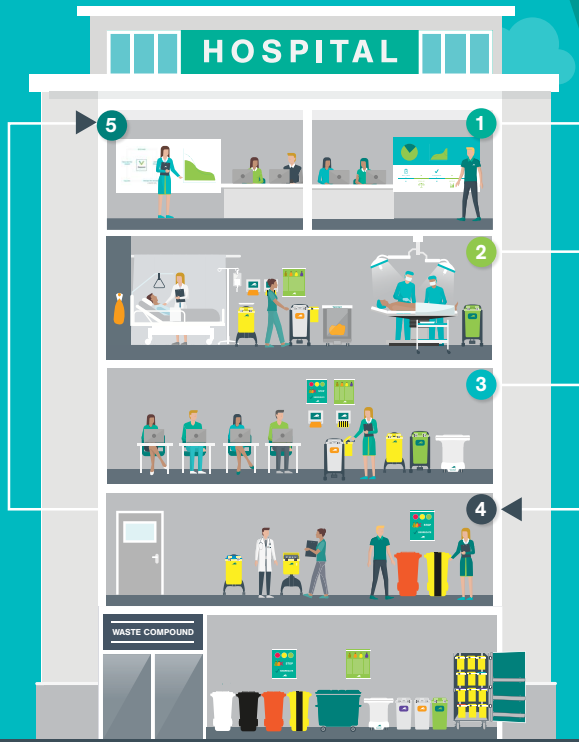

Waste companies stop here.

Sharpsmart services within the four walls of your facility.

Within the 4-Walls Clinical Approach

Where Sharpsmart make the biggest difference is supporting your healthcare environment in managing waste within the 4-walls, whilst keeping the 5 areas of need (safety, sustainability, education, compliance & efficiency) at the forefront of our focus. It is our aim to put forward solutions which help focus on these areas to drive improvements and meet the needs of the hospital.

This process provides a continuous improvement loop which is hospital lead and provides accountability to both Sharpsmart and throughout the supply chain. As changes are made over the course of a year and improvements realised by the hospital, we will then restart the process of looking at the waste policy to ensure it is accurate and relevant to the hospital's practices and needs before reviewing goals and setting new targets as required.

New! Introducing Sharpsmart's Verify Waste Configuration Software

Verify is a unique system available only to Sharpsmart customers. Built around your waste management policy the system allows all Trust staff access via a secure webpage. Once in the system staff are able to browse their audit reports & findings, compliance documents and guides as well as being able to use the educational aspects of the tool.

The resource portal will become your go-to location for all waste management documents, policies, site registers and audit reports, as well as links to regulatory and industry guidance.

By being able to search for particular waste items, instruments or drugs and answering a few simple set questions the user can identify the most appropriate waste disposal method for that item*.

*Only applicable waste items, streams and receptacles are available dependent upon department.
