

TracSmart

The smartest way to track & manage your portering service

Sharpsmart is working in partnership with healthcare facilities to deliver a highly efficient portering service, supporting efficiency and tracking optimisation in waste scheduling, container movement, segregation and waste disposal.

Sharpsmart's latest innovation **Tracsmart**, an intuitive cloud-based portering system, brings streamlined traceability to every aspect of waste movement. Tracking containers and staff movement, the system captures the entire waste journey from initial point of disposal through to waste holding, transport and final treatment stage.

THE BENEFITS

EASY SCHEDULING

Generate efficient daily collections schedules

INSTANT

Highlight any issues in 'real-time'

TRACKING

Track the location/status of all waste holds, receptacles & porters

QUICK RESOLUTIONS

Schedule immediate ward level collections

EASY STAFF USE

Electronic clocking in/out feature for portering staff

TracSmart is a 'cradle to grave' solution

designed to capture the full life-cycle of healthcare waste and identify optimisation improvements in movement, collection, segregation and compliance.

The Tracsmart system is operated using easy-to-use handheld devices and strategically placed barcodes, all unique to a specific location, action or receptacle. The system can track the filling frequency & movement of each receptacle, which will then be used as the foundation for driving optimisation and improvements. TracSmart can also be used to monitor staff performance, manage inventory and aid in additional training.

Aligning with the 5 needs of UK Healthcare

SHARPSMART.CO.UK

TracSmart supports the needs of your facility in the following 5 key areas:

Safety

Porters can quickly record any spillages or non-conformances so they can be dealt with before causing an injury. They can also identify when a receptacle is overfilled and not suitable for manual handling.

Sustainability

Staff no longer need to print off daily job sheets, schedules, performance reports, etc, which would typically create a lot of paperwork.

Efficiency

The most efficient saving is time, through the reduction of unnecessary collections and waste movement.

Compliance

TracSmart aids compliant waste segregation and ensures all waste is consigned correctly.

Education

Porters can highlight any on-site compliance issues where additional training of staff is required.
