Sharpsmart
MAKING HEALTHCARE SAFER

Verify Waste Configuration & Audit Tool

Waste compliance and expertise at your **fingertips**

Sharpsmart works in partnership with facilties to improve compliance and ensure that all staff are safe and well informed of their waste segregation requirements, to allow all waste to be disposed of in the most sustainable manner. Our new Verify Waste Configuration & Audit Tool, is a unique solution to educate and ensure compliance, built to match the procedures and practices of your facilities waste management policy as well as current legislation.

Designed for You

Desgined in line with your local waste policy, and available on your mobile, tablet or computer, this tool is bespoke to your facility to make compliance easy for you.

A Training Tool

Allowing live segregation training at point-of-care, Sharpsmart Verify allows you to learn or educate others whilst segregating.
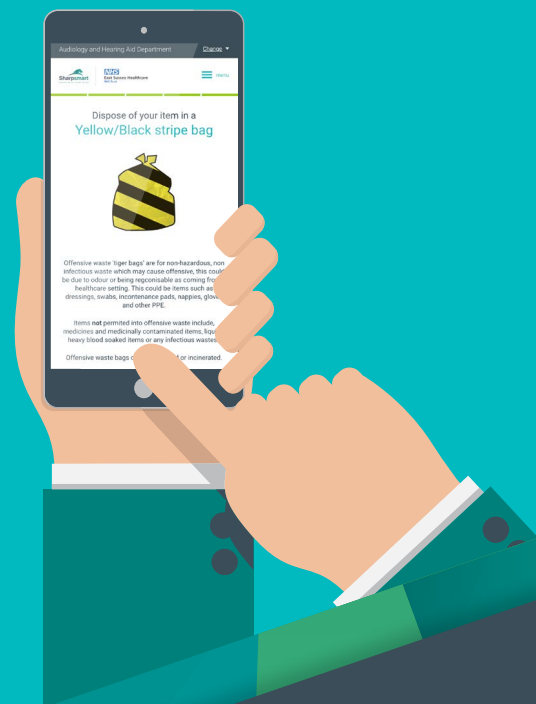

One Portal

Sharpsmart Verify is a portal for accessing education resources, policies, waste output reports and audits, all in one easy-to-use interface.

Compliance & expertise at your **fingertips.**

1 Select the department you are in

2 Select the item being disposed of

3 Select if it's sharp or not

4 Select the type of contaminant present

5 Dispose in the identified receptacle

Software Features

SEARCH BY ITEM OR RECEPTACLE

Search for the correct disposal solution for a particular item or instrument. By answering set questions on the waste type and its contaminants the tool can identify the correct disposal method.

RESOURCE CENTRE

This includes a number of unique items such as your facilities waste policy & procedures, audit reports, educational tools, posters and e-learning files. In this section you will also be able to review usage reports via Google Analytics.

AUDIT TOOL

Sharpsmart Verify records search criteria data for individual departments (e.g. department name, receptacle, waste type, contaminant, packing method, etc) uses this to develop auditing reports that identify areas of compliance and non-compliance. These reports can be used as part of a pre-acceptance audit as well as a general waste audit.
